

NON-BUILD ALTERNATIVES

- **No-Build**

- Assumes only regular maintenance, no geometric, safety, or capacity improvements

- **Transportation Systems Management (TSM)**

- Small improvements to the existing transportation system for more efficient use of existing facilities (ex. Construction of shared-use facilities, additional turn lanes at intersections, shoulder improvements)

- **Travel Demand Management (TDM)**

- Policy Changes that can be implemented to influence behavior to reduce demand for vehicle trips (ex. Ride sharing programs, alternative work times, promoting land use patterns to accommodate multi-modal transportation systems)

- **Transit**

- **Alternate Routes**
